

Mohamed Ezzat

Summary

I am a software engineer with over 6 years of hands-on experience in Java and Spring Boot. I excel in developing high-performance, scalable web solutions and thrive on solving complex technical challenges. With expertise in microservices architecture, database management, and modern DevOps tools, I bring a collaborative approach to building innovative software systems. A proficient planner and problem solver, I have a strong focus on continuous learning and delivering impactful solutions. Skilled in debugging, and backend development, I am committed to driving technology-driven success in every project.

Experience :

Senior Software Engineer | Java Developer

Sinee

Client: Prince Sattam bin Abdulaziz University - KSA

From 02/2026 to now

- Leading backend development for secure digital services in higher education.
- Developing Spring Boot microservices with strong focus on performance and system stability.
- Building secure APIs for integrations with external systems.
- Implementing authentication and authorization using Spring Security and Keycloak.

Industries:

- Public Sector – Higher Education

Senior Software Engineer | Java Developer

Reality Code

Client: Ministry of Human Resources and Social Development - KSA

From 07/2025 to 1/2026

- Designing and developing multiple microservices supporting government digital services.
- Contributing to scalable, secure, and efficient backend solutions.
- Focusing on performance, system stability, and secure architecture for critical government platforms.

Industries:

- Government

Consultant | Senior Software Engineer | Java Developer

Deloitte.

Client: Zakat, Tax and Customs Authority

From 06/2023 to 06/2025

- Works on multiple projects Development & Maintains.
- Using technologies : Spring boot , Spring Cloud ,Spring Data (JPA & JDBC) ,Spring Security, JUnit , Mockito , Spring Patch , Camunda, Microservice , Docker , Kafka , SQL , MongoDB, Identity and Access Management (IAM)
- Working on large scale projects on KSA, Jordan and Oman.

Industries:

- Finance / Banking
- E-invoicing
- Government

Software Engineer | Java Developer

Agile Technologies

From 07/2022 to 06/2023

- Works on multiple projects Development & Maintains.
- Using technologies : Spring boot , Spring Cloud ,Spring Data (JPA & JDBC) ,Spring Security, Spring Patch , Camunda, Microservice , Docker , Kafka , SQL , MongoDB .

Software Engineer

Skärpt

From 11/2020 to 07/2022

- Worked as software developer on multiple projects,Developing services using python,Handle SQL queries,Developing projects using Google APIs.
- Maintaining the stability for the backend of the project, Working using Java and Python.

Technical Skills:

- **Programming Languages:** Java, Python, C++.
- **Frameworks and Libraries:** Spring Boot, Spring Security, Spring Batch, Camunda, Activiti, Flask.
- **Database Management:** SQL, MongoDB, PostgreSQL, Oracle DB, MYSQL.
- **Architecture & Design:** Microservices Architecture, Event-Driven Architecture, Layered Architecture, RESTful API Design, Distributed Systems, SOLID Principles, Design Patterns, Clean Architecture.
- **Development Tools:** Git/GitHub, IntelliJ IDEA, Gradle, Maven, JMeter.
- **Testing:** JUnit, Mockito, Integration Testing.
- **Microservices and Architecture:** Microservices Design, RESTful APIs, Event-Driven Architecture.
- **Messaging and Event Streaming:** Kafka, RabbitMQ.
- **Containerization and Orchestration:** Docker, Kubernetes, Rancher, Jenkins, CI/CD Pipelines.
- **Identity and Access Management (IAM):** Authentication and Authorization solutions, Keycloak.
- **Version Control and Collaboration:** Jira, Azure DevOps.
- **Web Fundamentals:** HTML, CSS.
- **Additional Skills:** Agile Methodologies, Problem Solving, Debugging, Time Management, Team Leadership.

Projects:

E-Invoicing – Jordan

- Implemented data validation and business rules to ensure compliance with regulatory standards.
- Enhanced invoice processing reliability and reduced validation errors.

E-Invoicing – KSA

- Designed and built a Spring Boot service to transfer large datasets from SQL Server to SAP HANA.
 - Ensured high performance, data integrity, and fault-tolerant processing.
 - Supported regulatory compliance for ZATCA systems.
-

E-Invoicing OTA

- Developed user registration and authentication flows using Keycloak (IAM).
 - Integrated secure login, role-based access control, and token management.
-

Bank X

- Added new backend features and enhancements for banking services.
 - Integrated with the Payment Hub for secure transaction processing.
 - Worked extensively on IAM / Keycloak for authentication and authorization.
-

NPN & Pricing Tool

- Designed and created database schemas and Spring Boot microservices from scratch.
 - Developed RESTful APIs to manage pricing rules and resource.
 - Contributed to scalable microservice architecture.
-

E-Invoicing – KSA (Enhancement & Support)

- Investigated and resolved production issues across multiple modules.
 - Added new features and improved existing components.
 - Enhanced performance, reliability, and compliance with ZATCA regulations.
 - Led the upgrade of Java and Spring Boot versions across 20+ microservices, including dependency alignment and compatibility fixes.
-

Data Integration & Enrichment Service (Spring Batch) – KSA

- Designed and implemented an **enterprise-grade Spring Batch service** orchestrating integrations with **15+ external APIs** across **government and third-party systems**.
 - Processed, validated, and **persisted large volumes of data** into relational databases.
 - Implemented **retry, error handling, and logging mechanisms** to handle partial failures and unstable external services.
 - Optimized batch performance using **chunk processing and parallel execution**.
 - Ensured data consistency and reliability across multiple integration workflows.
-

Certifications and online courses :

Android Diploma for beginners (AMIT)

SCCI Appsplash participant

SCCI Publications member

Android Mobile Applications Development Diploma (YAT)

Introduction to software testing - Information Technology Institute (ITI)

Java: Testing with JUnit - LinkedIn

HackerRank Java (Basic) Skills Certification – HackerRank

Oracle Cloud Infrastructure 2023 Certified Foundations Associate

EDUCATION

Computer Science	bachelor's degree
Akhbar Elyoum Academy	Good

2015 – 2019

- **Coursework concentration:** Mathematics, Statistics, Data structures, OOP, Algorithms design, Database manager systems, Computer vision, Neural networks and Software design methodologies.
